Celerity Expands Product Line-Up with Fiber Optic HDMI Keystone Wall Plates

Irvine, CA – May 24, 2016 – Celerity Technologies, the leader in long distance 4K fiber optic solutions, is expanding their product offering of Detachable Fiber Optic HDMI cables with a Keystone Wall Plate transmitter and receiver design. The Celerity DFO-KEY series includes Celerity Fiber Optic cable and will begin shipping in June 2016.

Designed to allow installers the ability to pre-wire a Celerity fiber optic HDMI connection with a clean architectural finish, the Celerity Fiber Optic HDMI Keystone modules snap into the supplied two-port keystone wall plate. The in-wall keystone modules securely connect to the Celerity fiber optic cable via a micro connector at a 30° angle allowing for reduced in-wall depth.

“We offer our customers fiber optic products that are easy to install and dependable,” said Buzz Delano, Director of Business Development for Celerity. “Adding a keystone wall plate solution to our line gives our customers a convenient in-wall solution for 4K video runs using the industry standard keystone connector system.”

The Celerity DFO-KEY series consists of a Celerity keystone module transmitter/receiver pair, a spool of Celerity plenum-rate fiber optic cable, and a pair of single-gang two-port keystone wall plates. To provide power at the receiving side, Celerity dealers must also order an HDMI cable with 5V USB power from Celerity. Dealers may choose a 3' or 6' cable depending on their installation needs.

“For a 4K distributed video linking multiple sources and displays, a Celerity fiber optic connection is the only cable for 4K long distance. A convenient installer feature is our DFO technology where we separate the HDMI connector from the fiber’s optical module. This makes the cable easy to install and eliminates the need to terminate the fiber which, no matter how skilled the technician may be, is time consuming and prone to errors. We have eliminated this problem” said Delano.

Available at a suggested retail starting at \$300.00 for lengths from 35' up to 1000', the Celerity Fiber Optic HDMI Keystone wall plates will begin shipping in June.
