

Celerity Fiber Optic HDMI News

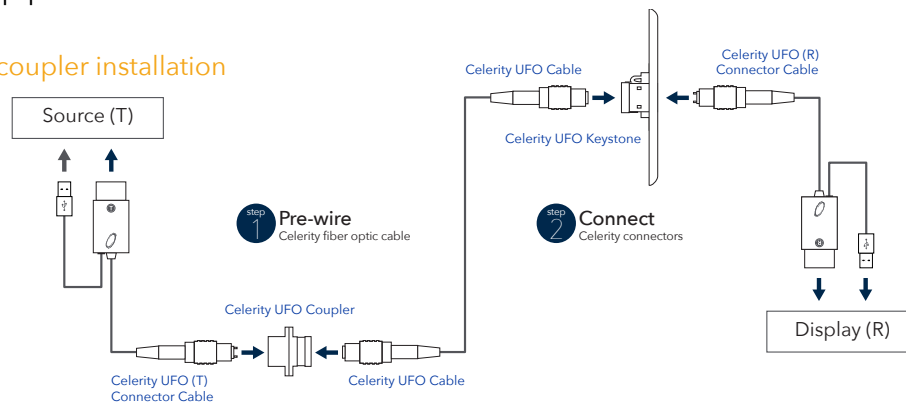

Our new Universal Fiber Optic HDMI offers an easy to use Keystone Wall Plate option. Purchased separately, the UFO-KEY-WP allows coupling of the in-wall Celerity UFO fiber cable to the UFO TX and RX Connector Cables. A UFO keystone insert couples the two sections of fiber securely together. A slide-lock on the UFO fiber ends keeps the connection reliable.

The benefits of Celerity UFO Keystone Wall Plate are as follows:

- UFO Keystone coupler accepts slide-lock in-wall fiber and UFO TX and RX Connector Cables securely
- UFO Keystone Wall Plate installs at TX, RX or both
- UFO Keystone Wall Plate is a good approach for prewire of UFO fiber for future use
- UFO Keystone Wall Plate and Coupler are available in pairs
- Eliminates copper HDMI extensions
- No USB power connection needed at the wall plate
- Rubber cap protects fiber connector from contamination
